

Agribusiness

A CORE SECTOR OF MISSOURI'S ECONOMY

The agriculture industry is part of Missouri's heritage and comprises a large portion of our state's economy. Williams-Keepers LLC is proud to serve as a local resource for agribusiness entities operating in Missouri, including family farms, agriservice dealers, ethanol, biodiesel and biomass manufacturers, and agricultural cooperatives and associations.

WK provides audit, tax, and consulting services for agribusinesses. We can assist value-added entities with entity formation, raising capital, tax incentives and operational issues. Our Agribusiness Team attends annual conferences and other continuing education events to maintain their knowledge of current industry trends and provide our clients with excellent service.
